Applied Business Analytics Practical
Practical – IV

Roll No.:T032	Name: KHUSHI
Class:TYIT	Batch:2
Date of Assignment: 04/09/26	Date/Time of Submission: 04/09/26

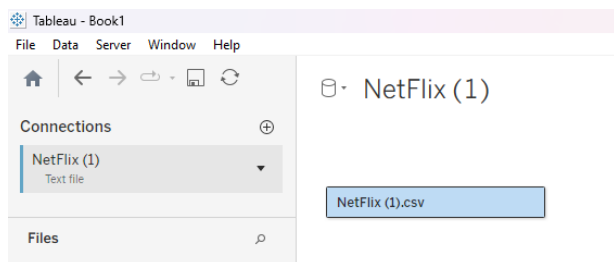

4. Business Intelligence Tools for Data Analysis.

a. Utilize a business intelligence tool (e.g., Tableau, Power BI) to extract insights from a dataset and create interactive visualizations for effective data analysis.

Dataset: netflix.csv

A. Connect and Understand the Data

- Open Tableau and create a new workbook.
- Connect the netflix.csv file to Tableau.

- View all the columns in the dataset.
- Identify which columns contain text, numbers, and dates.

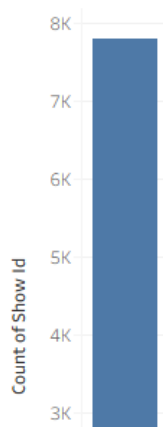

The screenshot shows the 'Columns' shelf in Tableau with the following fields: Show Id, Type, Title, Director, Cast, Country, Date Added, Release Year, Rating, Duration, Genres, and Description. The 'Fields' list on the left shows the data types for each field: Show Id (text), Type (text), Title (text), Director (text), Cast (text), Country (text), Date Added (date), Release Year (date), Rating (float), Duration (float), Genres (text), and Description (text).

Field Name	Physical Table	Remote Field Name	Type
Show Id	NetFlix (1).csv	show_id	Text
Type	NetFlix (1).csv	type	Text
Title	NetFlix (1).csv	title	Text
Director	NetFlix (1).csv	director	Text
Cast	NetFlix (1).csv	cast	Text
Country	NetFlix (1).csv	country	Text
Date Added	NetFlix (1).csv	date_added	Date
Release Year	NetFlix (1).csv	release_year	Date
Rating	NetFlix (1).csv	rating	Float
Duration	NetFlix (1).csv	duration	Float
Genres	NetFlix (1).csv	genres	Text
Description	NetFlix (1).csv	description	Text

- Find the total number of records in the dataset.
- Find the total number of Movies and TV Shows in the dataset.

Find Total Number of Records

KHUSHI T032

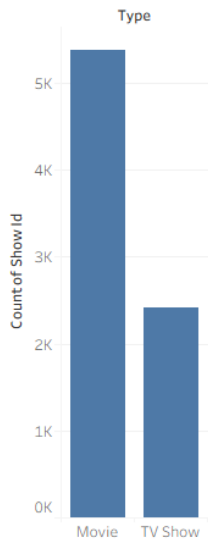

B. Create Different Visualizations

- Create a bar chart to compare the number of Movies and TV Shows.

Bar Chart – Movies vs TV Shows

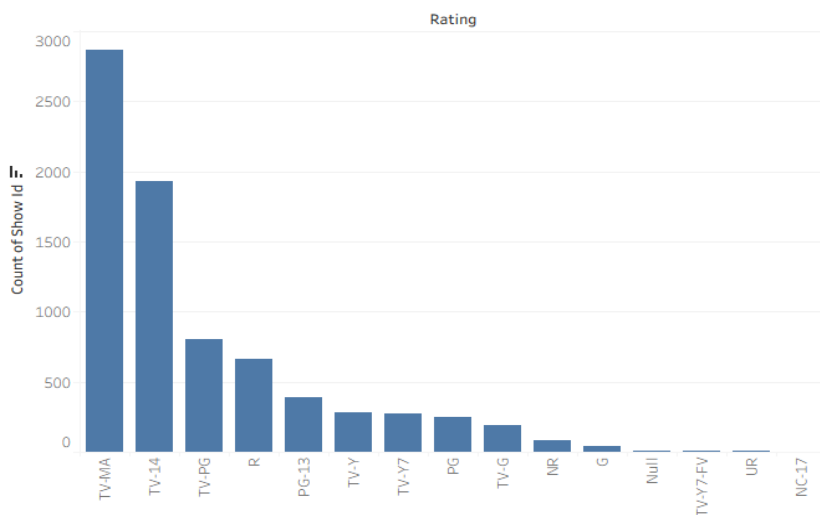

KHUSHI T032

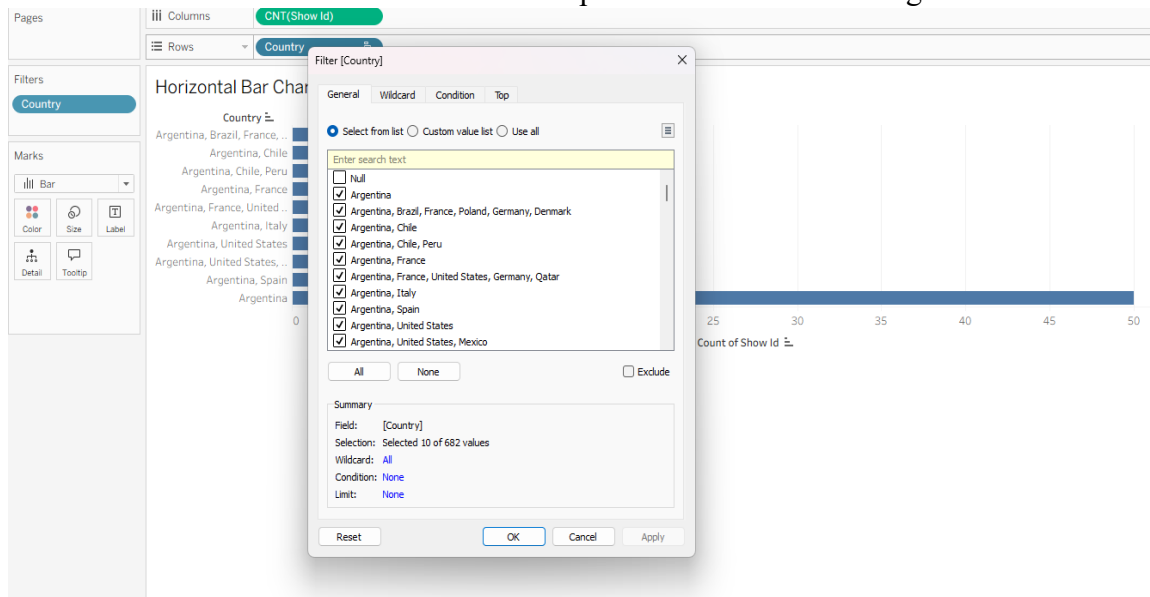

- Create a bar chart to show the number of titles for each Rating.

Number of Titles for Each Rating

KHUSHI T032

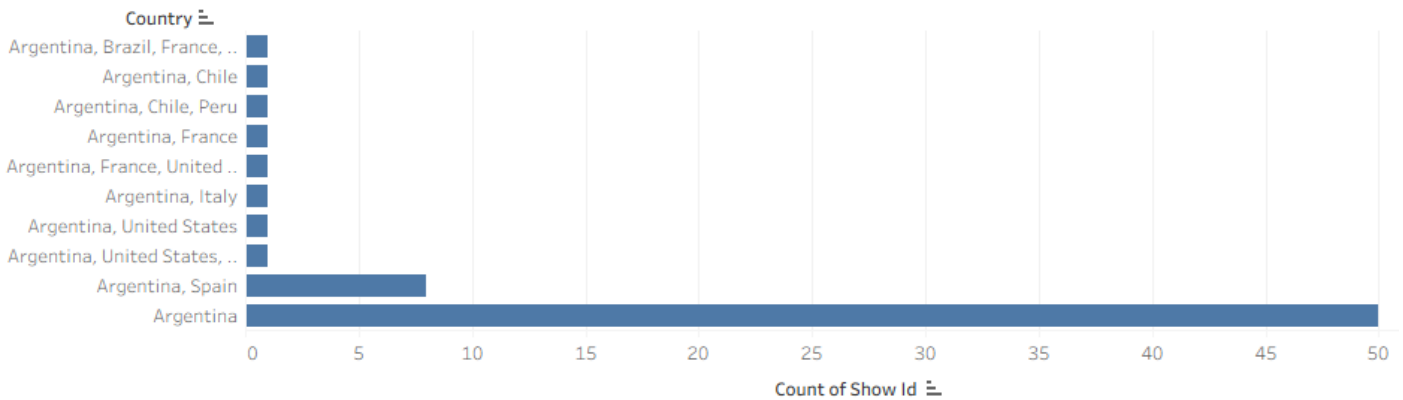

- Create a horizontal bar chart to show the top 10 countries with the highest number of Netflix titles.

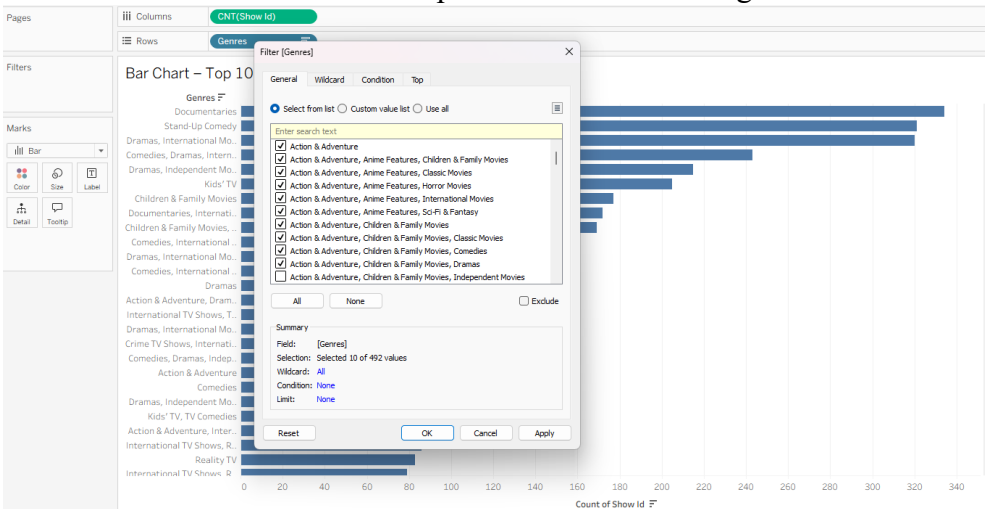

Horizontal Bar Chart – Top 10 Countries

KHUSHI T032

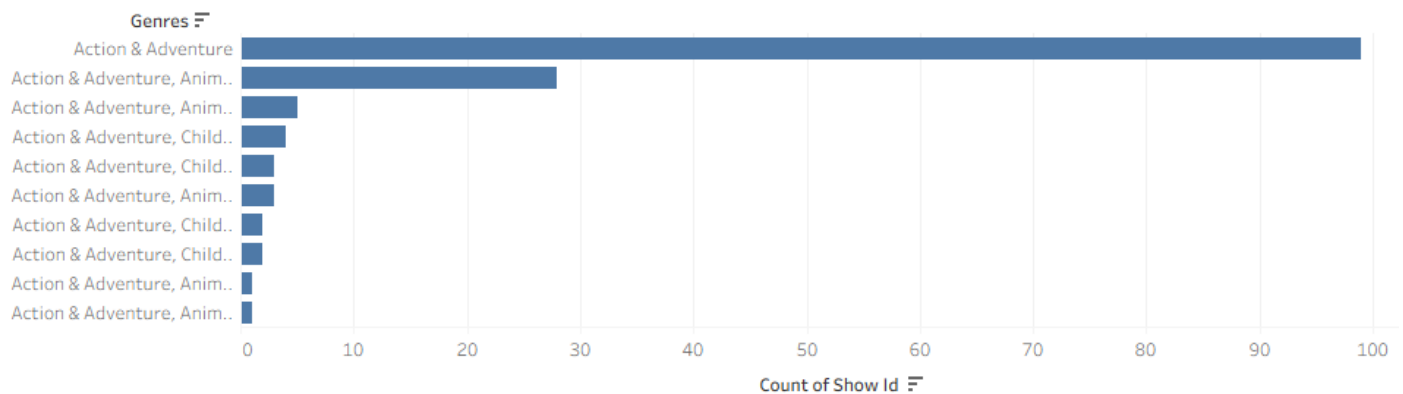

- Create a bar chart to show the top 10 Genres with the highest number of titles.

Bar Chart – Top 10 Genres

KHUSHI T032

- Create a pie chart to show the percentage of Movies and TV Shows.

Percentage of Movies and TV Shows

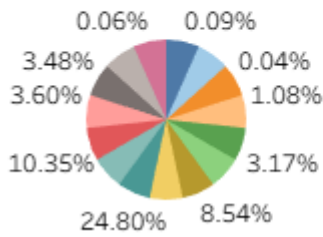

KHUSHI T032

- Create a pie chart to show the percentage of titles for different Ratings.

Pie Chart – Percentage of Titles for Ratings

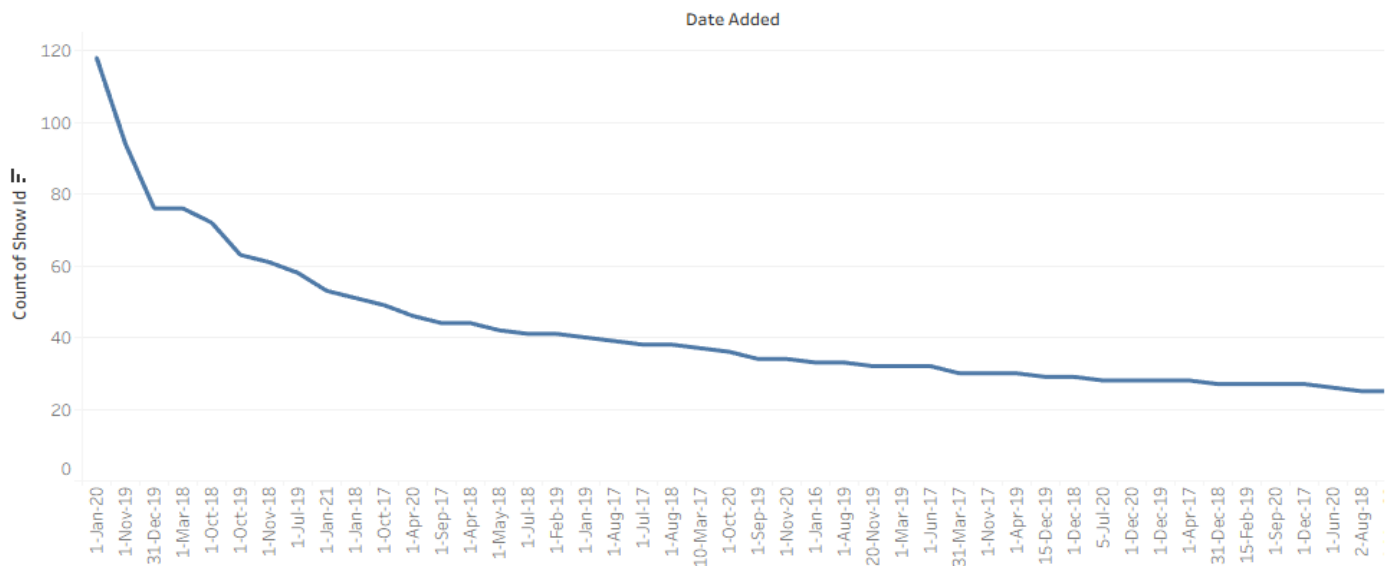

KHUSHI T032

- Create a line chart to show the number of Netflix titles added in each year.

Netflix Titles Added Each Year

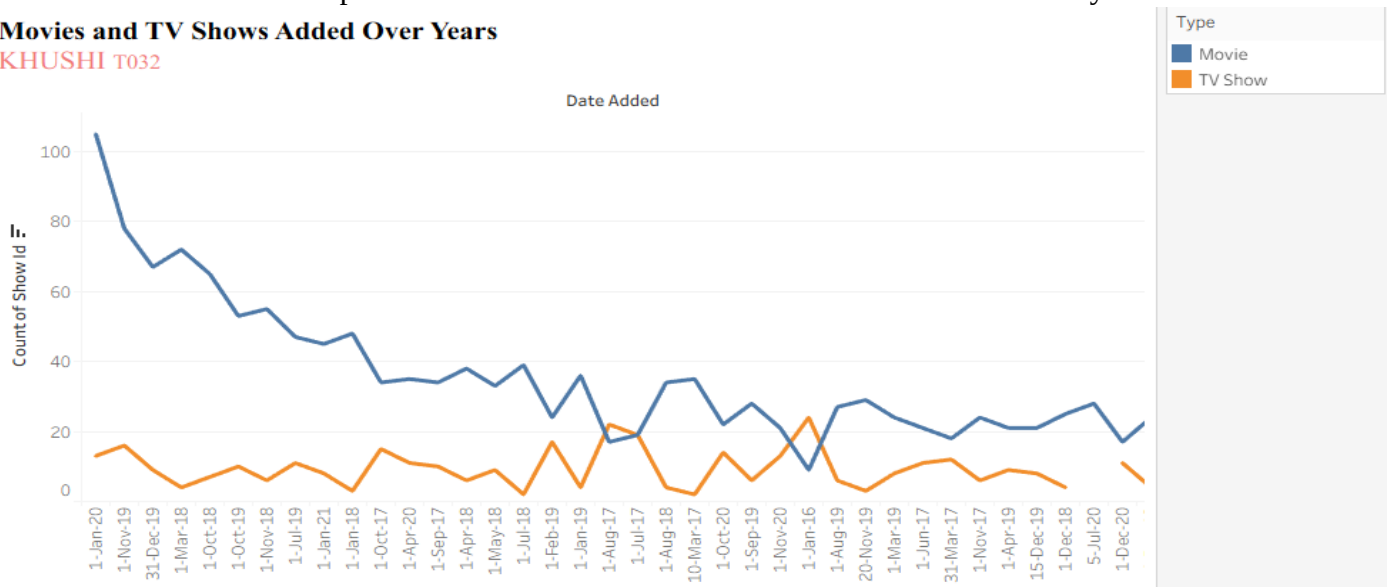

KHUSHI T032

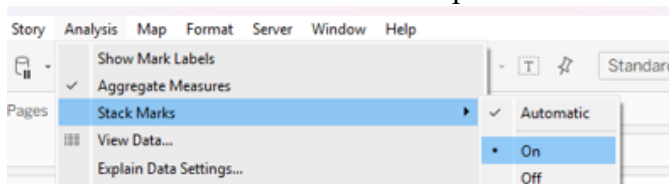

- Create a line chart to compare the number of Movies and TV Shows added over the years.

Movies and TV Shows Added Over Years

KHUSHI T032

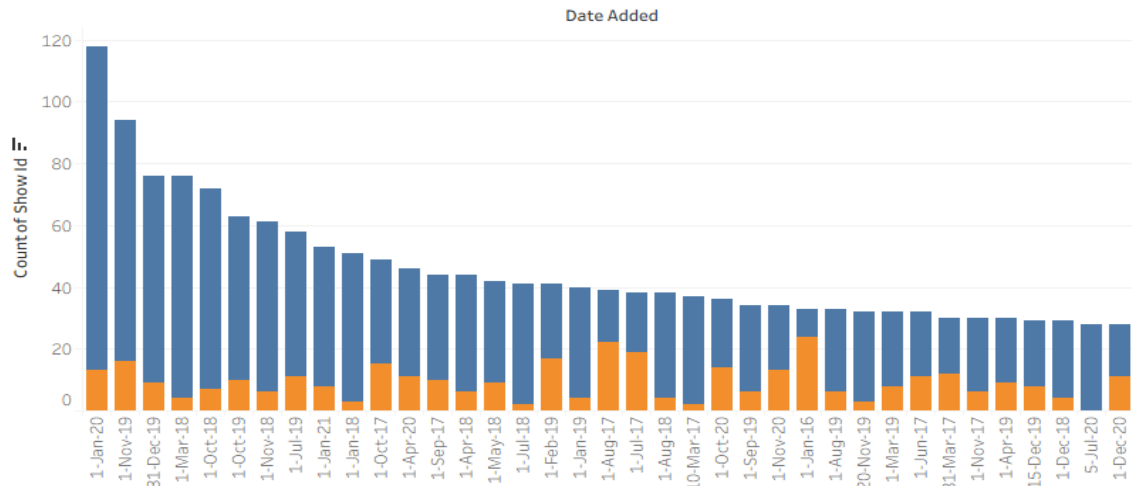

- Create a stacked bar chart to compare Movies and TV Shows for each year.

Movies and TV Shows for Each Year

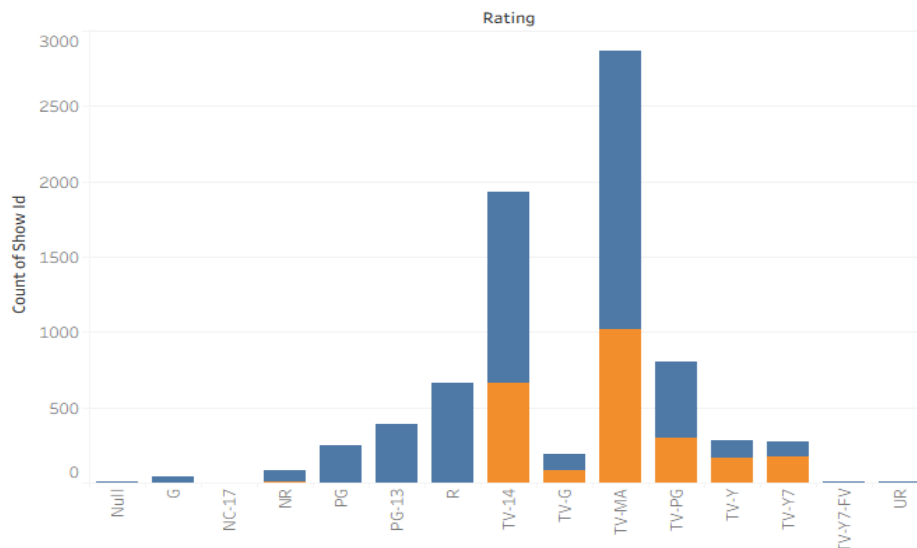

KHUSHI T032

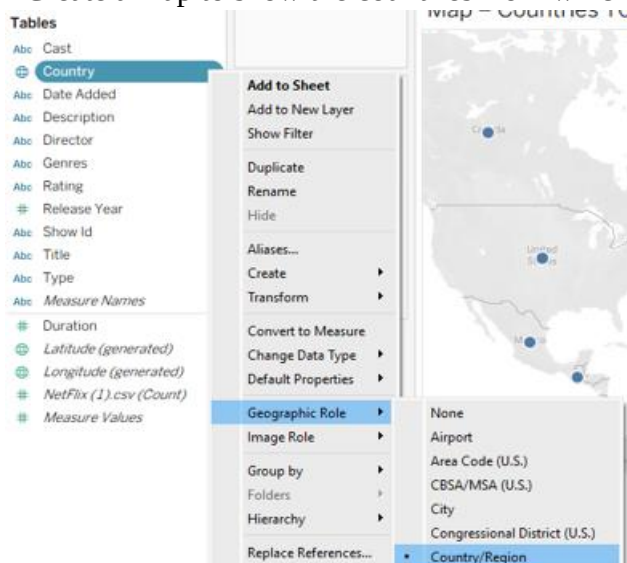

- Create a stacked bar chart to compare Movies and TV Shows for different Ratings.

Movies and TV Shows for Different Ratings

KHUSHI T032

- Create a map to show the countries from which Netflix titles are available.

- Use the map to show the number of Netflix titles for each country.

Number of Titles for Each Country

KHUSHI T032

- Create a histogram to show the distribution of Movie durations.

☐ TV-G
☒ TV-MA
☐ TV-PG

All None ☐ Exclude

- Add a Year filter to view titles from a selected year.
- Use two or more filters together and observe how the charts change.

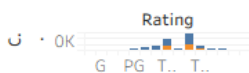

D. Create a Dashboard

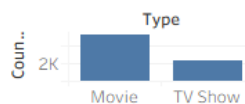

- Create a new Tableau Dashboard.
- Add the charts created in the previous steps to the dashboard.
- Arrange the charts properly so that they are easy to understand.
- Add filters to make the dashboard interactive.
- Give a suitable title to the dashboard.
- Add suitable titles and labels to the charts.
- Select different filter values and observe how the dashboard changes.

E. Find Insights from the Data

1. Which type of content is available more on Netflix?

Movies are available in greater numbers than **TV Shows** on Netflix. This shows that Netflix has a larger collection of movies.

2. Which country has the highest number of Netflix titles?

The **United States** has the highest number of Netflix titles. It contributes a major portion of the content available on Netflix.

3. Which Rating has the highest number of titles?

TV-MA has the highest number of titles. This indicates that a large amount of Netflix content is intended for mature audiences.

4. Which year had the highest number of titles added to Netflix?

2019 had the highest number of titles added to Netflix, showing a significant expansion of the Netflix content library during that year.

5. Which Genre has the highest number of titles?

International Movies is one of the genres with the highest number of titles, showing the wide variety of international content available on Netflix.

6. Which Movie duration range has the highest number of Movies?

The **90–99 minutes** duration range has the highest number of movies, making it the most common movie-length category in the dataset.

Five Important Observations from the Tableau Dashboard :

1. Netflix contains **more Movies than TV Shows**, making movies the dominant content type.
2. The **United States** has the highest contribution of titles compared with other countries.
3. **TV-MA** is the most frequently occurring rating in the dataset.
4. The number of titles added increased significantly around **2019**.
5. **International Movies** is one of the most frequently occurring genres, showing that Netflix offers content from different parts of the world.

Three Conclusions about Netflix Content :

1. Netflix has a **large and diverse content library**, with Movies making up the majority of the available titles.
2. The platform provides content from **many different countries and genres**, making it suitable for viewers with different interests.
3. The high number of **TV-MA-rated titles** indicates that Netflix has a strong collection of content aimed at mature audiences.
